Kelsey Cox - Full Stack Developer

kelsey.cox169@gmail.com || github.com/kelcc169 || linkedin.com/in/kelseyrcox

Seattle, WA || (425) 749-6596 || kelcc.com

Former teacher, now a Full Stack developer with skills in React, Typescript, Node.js, and Javascript. Adaptable and creative with problem solving.

Technologies:

Node.js	React	Typescript	Javascript	Postgres	SQL
JWT Auth	Express	MongoDB	Python	Django	Mongoose

Projects:

Shelf Life - React, Typescript, Node.js, MongoDB, Express, JWT Auth
Maintain your own personal library! Designed to resemble old library card catalogs and check out cards, keep track of what you have and what you've loaned out.

LYS Finder - Express, Postrges, Sequelize, Node.js, EJS, Mapbox
Find local yarn stores and save the ones you're interested in. Uses Ravelry's (the largest repository of fiber related data) API.

SoLaMi - Javascript, HTML, CSS
Practice solfeggio aural recognition in a two player game. Players take turns identifying different snippets of songs and repeating them by clicking the associated hand signs.

Scavenger Hunt - React, Express, Node.js, MondoDB, Mapbox, Cloudinary
Create scavenger hunts of locations around Seattle and go on ones created by others.

Other Work Experience:

Carnation Elementary School, RSD – Music Teacher (September 2013 – June 2018)
Taught elementary school students grades Kindergarten through 5th grade. Mapped multi-year content knowledge requirements and created grade level plans to meet those standards. Generated tests for student growth to inform future instructional needs.

Education:

General Assembly - Software Engineering Immersive - graduated August 2019

University of Arizona - Bachelor of Music Education - graduated December 2010
